

Suzuka Cervical IBF System

The Altus Spine **Suzuka** Cervical IBF System is designed as a simple, yet complete, cervical intervertebral body fusion system. The single tray layout and range of implants reduce operating room logistics while providing the surgeon with options for the patient. Implants are available in precision machined PEEK, and titanium that incorporates MicroLOC™ surface texturing intended to promote bone growth.

Refer to Product Insert (PI-008) for complete system description, warnings, and precautions.
