

AltusSpine

Suzuka Titanium
IBF System

The Altus Spine **Suzuka Titanium Cervical IBF System** is designed as a simple, yet complete, cervical intervertebral body fusion system. The single tray layout and range of implants reduce operating room logistics while providing the surgeon with options for the patient. Each implant is precision machined and incorporates MicroLOC™ surface texturing intended to promote bone on-growth.

Refer to Product Insert (PI-008) for complete system description, warnings, and precautions.
